

Model 73-801

Powerful mobile fume extractor with a compact, space-saving design. Designed for high volume production welding, this unit is effective for all types of welding materials and processes.

Featuring 18 filtering combinations, including HEPA for Hexavalent Chromium control

Model 73-801

- 1100 CFM high vacuum fume extraction and filtration capability
- High-capacity HEPA filter available to ensure maximum worker protection against Hexavalent Chromium and other harmful substances
- 18 filtering combinations available permit maximum flexibility for varying work applications (filters sold separately)
- 10-foot durable articulating extraction arm with 360° rotation capability
- Built in AC convenience to power other tools and devices
- Magnahelic gauge alerts operator to filter condition and change time
- Built-in spark trap for fire safety
- Heavy-Duty, all-steel cabinet for years of rugged use
- Optional Weldsense™ arc sensing device facilitates ease of use, saves energy, and lengthens filter life
- Optional two-operator feature increases worker efficiency and cost effectiveness
- Two-year limited warranty
- Made in USA
- 33”L x 59”H x 26”W
- 325 lbs.
