

WELDING FUME EXHAUSTERS & ARMS

The Ace 75 Series is our flexible and effective line of welding fume exhausters and extraction arms for shops that elect to exhaust their weld fumes outdoors instead of through filter systems. The 75 Series line include several blowers to meet the specific ventilation and electrical needs of any shop, as well as an extensive lineup of extraction arms in a wide variety of lengths to reach most work areas.

- Arms are easily adjustable to any position.
- Arms are self-supporting stay in position until moved again.
- Arms are available in, 3 lengths each, 7, 10, and 14 feet.
- Arms can be extended by swivel booms in 7, 10, and 13 foot lengths.
- Exhausters are rated between 785 and 1100 cfm.
- Available in 1.5 to 3.0 HP sizes, and 115-460 volt, single to three phase versions.
- Contact factory for complete application and installation support.
